# PRACTITIONER GUIDE

# PRODUCTS AT-A-GLANCE

## SSR(Series Symptom Relief): Basic Protocol

Products for the *SSR Basic Protocol* are all included in our *DesBio SSR Package*. They may also be purchased separately.

### Weeks 1-9

#### *Comprehensive Homeopathic Detox Kit*

This kit contains six homeopathic remedies — *CerebroMax*, *SpinalMax*, *Matrix Support*, *Detox I*, *Detox II* and *Detox III* — to temporarily relieve symptoms of detoxification throughout the entire body including the brain, spine, extracellular space, liver, gastrointestinal tract, bladder, kidneys and lymph. These remedies are taken in a 7-day cycle throughout the entire protocol.

#### *Series Kits* (2 of each are required)

Each kit contains 10 vials of varying homeopathic dilutions of the specific pathogen or nosode you have selected work with. You choose two of the same *Series Kits* to add to this package. The kits are taken over a 60-day course. The first kit is taken in **ascending** order (1 – 10) and the second kit in **descending** order (10 – 1).

#### *Smart Silver 32 oz.* (Not a colloidal silver)

*Smart Silver* provides immune system support throughout the protocol. Your patient should use it daily to help with any die-off (Herxheimer) reactions. *Smart Silver* is taken daily throughout the *Series Kits* portion of the protocol.

#### *Liposomal Vitamin C*

Provides a therapeutic dose of Vitamin C in a form that ensures efficient absorption. Vitamin C is a potent antioxidant, a major factor in the body's immune response, and an enzyme cofactor vital to the production of collagen, cartilage, and blood vessels. *Liposomal Vitamin C* is taken daily throughout the *SSR Kits* portion of the protocol.

#### *HerX or Plus Remedy*

*HerX* and/or associated homeopathic *SSR Plus Remedies* were specifically designed to help temporarily relieve clearing symptoms. These remedies are taken daily throughout the *SSR Kits* portion of the protocol.

### Weeks 10-20

#### *SSR Kit 1M* (Not included in SSR Package)

Each 1M kit contains 10 vials of the 1M homeopathic dilution of the specific pathogen or nosode you have selected to work with. The 1M kits are taken once per week for 10 weeks after the initial *SSR Protocol*.

#### *SSR Kit 10M* (Not included in SSR Package)

Each 10M kit contains 10 vials of the 10M homeopathic dilution of the specific pathogen or nosode you have selected work with. The 10M kits are taken once per week following the 1M kit for 10 weeks after the initial *SSR Protocol*.

#### *Homochord* (Not included in SSR Package)

This 1oz formula contains all of the homeopathic dilutions found in the *SSR Kit* in one bottle. The homochord can be taken after your patient has completed the *SSR Protocol* as follow up (when no 1M/10M is available). This formula is taken as 10 drops, three times per day.

# Welcome to the DesBio SSR (SERIES SYMPTOM RELIEF) PROGRAM

Welcome to the *DesBio SSR (Series Symptom Relief) Program*. This homeopathic program is designed to support the immune system by helping your patient temporarily relieve symptoms associated with chronic infections. Unlike other chronic infection programs that simply work by strengthening the immune system, this program works by providing specific homeopathics that are tailored to individually address symptoms of some of the most common infectious agents. The result is a multi-faceted protocol that is completely customized to meet the needs of your patient.

This first section of this practitioner guide gives a general overview of the fundamentals of the *SSR: Basic Protocol*. In the second section, you will find additional support and product recommendations.

## How does this program work?

The *SSR: Basic Protocol* has five essential components:

- 1) *Comprehensive Homeopathic Detox Kit*
- 2) Two *SSR Kits*
- 3) *Smart Silver*
- 4) *Liposomal Vitamin C*
- 5) *HerX* and/or *Series Plus Remedy*

Utilizing all five of these components is necessary for your patient's comfort and success during this protocol. After completion of the basic protocol, your patient will continue on with *SSR 1M and 10M Kits*.

# SSR: BASIC PROTOCOL

## Five Simple Components

### 1) Comprehensive Homeopathic Detox Kit

The *Comprehensive Homeopathic Detox Kit* contains six specialized homeopathic remedies — *CerebroMax*, *SpinalMax*, *Matrix Support*, *Detox I*, *Detox II* and *Detox III* — to temporarily relieve detoxification symptoms throughout the entire body including brain fog, fatigue, joint pain, skin irritations, anxiousness, and general malaise. Most patients with chronic infections have a high toxic load and blocked detoxification channels. In addition, because viruses, bacteria, and other pathogens can cause effects throughout the body, full-body detoxification support is an essential piece of the success of the *SSR Protocol*. Patients not receiving adequate detoxification support may experience more discomfort during the protocol and may also not achieve optimal results. The *Comprehensive Homeopathic Detox Kit* is started one week before the *SSR Kits* and continued throughout the protocol.

### 2) SSR Kits

One week after starting the *Comprehensive Homeopathic Detox Kit*, your patient will begin the *SSR Kits* portion of the protocol. DesBio currently offers several *SSR Kits* representing some of the most common infectious agents. The *SSR*

*Kits* are based on the homeopathic concept of nosodes. A nosode (from nosos, the Greek word for disease) is a homeopathic preparation or dilution made from a diseased tissue or disease-causing organism. Each *SSR Kit* contains 10 vials, and each vial contains a nosode in a varied homeopathic potency of the pathogen you have selected. **To complete the *SSR Protocol*, you need two kits or 20 vials total.** These vials are given in a strategic order, once every third day. The first kit is taken in **ascending** order (1 – 10) and the second kit in **descending** order (10 – 1).

### 3) Smart Silver

On the same day that your patient begins the *SSR Kits*, they will start *Smart Silver*. *Smart Silver* is incorporated into the protocol to support the immune system. Taken daily throughout the *SSR Kit* portion of the protocol, *Smart Silver* works synergistically with the kits in strengthening the immune response.

### 4) Liposomal Vitamin C

On the same day that your patient begins the *SSR Kit* portion of the protocol, they will start *Liposomal Vitamin C*. A daily dose of *Liposomal Vitamin C* provides ongoing immune support.

## SSR (Series Symptom Relief) Package

Consider using our **SSR Package**. Each package includes everything you need to complete the 60-day **SSR Protocol** including:

- 2 **SSR Kits**
- 1 **Comprehensive Homeopathic Detox Kit**
- 32 oz of **Smart Silver**
- 1 5 oz bottle of **Liposomal Vitamin C**
- 2 **Series Plus Remedies or HerX**

The package also includes a **SSR Program Practitioner Guide** with a sample calendar.

These remedies do not contain homeopathic nosodes. See page 10 for more information.

## SSR 1M/10M Kits

After completing the initial two **SSR Kits**, you may recommend that your patients start the **1M and 10M SSR Kits**. These kits look similar to the **SSR Kits**, but instead of a series of dilutions, they each contain 10 vials in a 1M or 10M homeopathic potency. See page 9 for more details.

Taking vitamin C through a liposomal delivery system allows the patient to receive high doses of this micronutrient orally, without causing gastric upset. Studies have shown that **Liposomal Vitamin C** has a longer half-life in the body, indicating it may have enhanced benefits on immune health and general well-being.

## 5) HerX or Plus Remedies

On the same day that your patient begins the **SSR Kits**, they will start the associated **Series Plus Remedy** or **HerX**. These remedies offer a targeted homeopathic approach to temporarily relieving symptoms associated with Herxheimer and other proving reactions while your patient is using the **SSR Kits**.

# SSR: BASIC PROTOCOL

Below are the general guidelines for the *SSR: Basic Protocol*. As always, it is up to you as a practitioner to determine what is appropriate for your patient and what steps they can tolerate. In addition to this basic outline, suggestions for additional support are outlined beginning on page 10.

## Week One (Days 1-7) *(Sample calendar below.)*

### *Comprehensive Homeopathic Detox Kit*

This kit will be continued throughout the protocol — until the bottles are empty or about 8 weeks. Drops may be taken under the tongue or combined in a large water bottle and sipped throughout the day.

### *CerebroMax, SpinalMax, Matrix Support:*

Days 1-3 — 10 drops three times per day

*Detox I, Detox II, Detox III:* Days 4-7 — 10 drops three times per day

## Weeks 10-30

After completion of the *Basic SSR Protocol* (Weeks 1-9), the next step in the *DesBio SSR Program* is to begin the *1M* and *10M SSR Kits*. This part of the program will take your patient 20 weeks to complete.

### 1M/10M SSR Kits

*1M* and *10M* kits are available as ANAP, BABE, BORR, BOBA, BRUC, CAND, CDIF, CHLA, COXS, CYTO, EPST, GIAR, HEPA, HPYL, HERS, HERZ, HV-6, MYCO, PAPI, ROCK, STRE, and TOXO.

The *1M* and *10M Series Kits* each contain 10 vials of only the 1M or 10M potency. These stronger remedies are excellent for helping the body in temporarily relieving deep underlying symptoms. After completing the initial protocol, the *1M Series Kit* is taken at 1

vial per week for 10 weeks followed by the *10M SSR Kit* at 1 vial per week for 10 weeks.

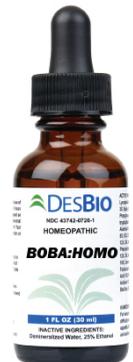

## FOLLOW-UP OPTION

### Series Homochord

*Homochords* are available as ANAP:HOMO, BART:HOMO, BOBA:HOMO, BRUC:HOMO, CAND:HOMO, CDIF:HOMO, CHLA:HOMO, COXS:HOMO, CYTO:HOMO, EPST:HOMO, GIAR:HOMO, HV-6:HOMO, HPYL:HOMO, HERS:HOMO, HERZ:HOMO, HV-6:HOMO, MYCO:HOMO, PAPI:HOMO, PARV:HOMO, PEPT:HOMO, RESP:HOMO, ROCK:HOMO, STRE:HOMO, and TOXO:HOMO.

A homochord remedy is a product that contains all of the dilutions that can be found in the *SSR Kits* (including the *1M* and *10M SSR Kits* if they are available) to help with temporary relief of symptoms. After completing the initial protocol, the homochord/ remedy can be taken 10 drops three times per day. One bottle will last for about 60 days. Additional bottles may be

necessary when you feel your patient should extend the protocol beyond one month or if you would like your patient to have a homochord on hand to deal with any recurring symptoms.

## Series Protocol **SUPPORT**

### Clearing Action Support

A clearing or herxheimer reaction is a short-term detoxification reaction within the body. During the [SSR Program](#), patients may present with issues related to detoxification impairments due to a congestion of excretory pathways. This can occur due to the die-off of potentially harmful substances. It is important to know that these symptoms should be mild to moderate and may include fatigue, general malaise, headaches, brain fog, digestive upset, and mild skin irritations. **If symptoms do not resolve quickly or are more severe in nature, it is critical to intervene and closely monitor your patient.**

[Series Plus Remedies](#) were specifically **designed to be companion remedies with the [SSR Kits](#)** — for example, [HERZ:PLUS](#) would be used in conjunction with the [HERZ:SSR Kit](#). These homeopathic formulas temporarily relieve the symptoms associated with clearing sensations.

When a specific [Series Plus Remedy](#) is not available, we offer [HerX](#). This remedy can be used alongside any [SSR Kit](#) or on its own to temporarily relieve clearing symptoms whenever they are present.

# ADDITIONAL CLEARING REACTION SUPPORT PRODUCTS

You can also take additional precautions as a practitioner to minimize your patient's likelihood of a clearing reaction. For more toxic patients, consider starting the patient on the *OmniCleanse Detoxification Program* before starting the *Series Program*. This may aid the body in reducing toxic load before starting the protocol, as well as increase their nutrition status.

For some patients, taking the *Comprehensive Homeopathic Detox Kit* on alternating days provides temporary symptom relief. For this approach, *CerebroMax*, *SpinalMax*, and *Matrix Support* are taken day 1, and *Detox I*, *Detox II*, and *Detox III* are taken day 2. This 2-day pattern is repeated.

**Consider overall nutrition.** Add in *OmniMeal* or *OmniEssentials* to fill in nutritional gaps.

**Evaluate for endogenous deficiencies in methylation or glutathione.** Consider *Liposomal Glutathione* or *Liposomal Methyl B*.

## OmniCleanse Detox Kit Protocol

Doing the full *OmniCleanse Detox Kit* is part of our our “Power of 3” *OmniCleanse Detoxification Program*. It includes the *OmniCleanse Powder*, *OmniCleanse Capsules*, and the *Comprehensive Homeopathic Detox Kit*. The first two weeks of the *OmniCleanse Program* utilize all three products.

The capsules and powder combine nutritionals and botanicals to support the body.

The homeopathics temporarily relieve the symptoms associated with the detoxification process. Your patient can use the *Comprehensive Homeopathic Detox Kit* provided in the *OmniCleanse Kit* during the *Series Protocol*.

## OmniEssentials

*OmniEssentials* is a multivitamin and mineral formula that incorporates whole-food organic vitamins with bioavailable micronutrients. With select specialty ingredients to support digestion, detoxification, and antioxidant activity, *OmniEssentials* provides the ultimate daily blend for health and well-being. It can be taken daily during any initial *SSR Protocol* or ongoing. Available with and without iron.

## Powerful Partners: *HerX* and *Liposomal Bio-Quercetin*

Clearing reactions are common during the *SSR Program* and can leave patients with uncomfortable symptoms. *HerX* was specifically formulated to temporarily relieve herxheimer sensations. *Liposomal Bio-Quercetin* may support the body's immune system when going through a herxheimer clearing process.

*Liposomal Bio-Quercetin* - Vitamin C combined with bioflavonoids such as quercetin that have known histamine quenching activity.

*HerX* is for the temporary relief of symptoms related to Herxheimer reactions such as brain fog, fatigue, chills, muscle discomfort, nausea, and malaise.

## OmniMeal

*OmniMeal* is the perfect combination of nutrients and great taste, providing the ideal supplement for busy individuals who value high quality nutrition.

*OmniMeal* features organic, food-sourced vitamins and TRAACS minerals, for high quality and bioavailable micronutrient supplementation. Each serving of *OmniMeal* provides 14 grams of protein, 13 of which are directly sourced from New Zealand Whey Protein to support healthy body composition and sustainable energy. Probiotics, specialty nutrients, and organic antioxidant blends support digestive health,

immunity, antioxidant activity, healthy detoxification processes, and overall well-being. It can be taken daily during any initial *SSR Protocol* or ongoing.

## Liposomal Glutathione

Low levels of this essential antioxidant can have a negative effect on health. Supplementing with a liposomal form of glutathione is a more direct way to increase glutathione levels. *Liposomal Glutathione* can be taken daily during any initial *SSR Protocol* or ongoing.

## Liposomal Methyl B

Methylation is crucial for many body processes and essential for detoxification. Bioactive B vitamins in a protective liposomal delivery system may be the best method for supporting these patients. *Liposomal Methyl B* can be taken daily during any initial *SSR Protocol* or ongoing.

# ADDITIONAL SUPPORT PRODUCTS

Nutritional and herbal combinations can be effective for supporting the immune system against pathogens. Consider products such as *PathoGuard* and *ProDefense*.

*Liposomal Resveratrol Curcumin* may be supportive for your patient's immune system.

Ongoing fatigue and frequent illness may be a sign of sluggish mitochondria. *The Replenish Kit* is a system that offers benefits similar to a myers cocktail.

Consider *Intestinal Restore* to support intestinal health. Consider *Leaky Gut Formula* to temporarily relieve symptoms related to leaky gut syndrome.

## Intestinal Restore

*Intestinal Restore* provides multifaceted support for digestive health and intestinal integrity. *Intestinal Restore* features Tegricel®, a source of serum antibodies and immunoglobulins, to support the healthy functioning of the gastrointestinal immune system. It also includes glutamine, mucilaginous herbs, and digestive enzymes.

## Leaky Gut Formula

*Leaky Gut Formula* is a homeopathic remedy for the temporary relief of symptoms related to leaky gut syndrome such as fatigue, seasonal allergies, joint pain, occasional constipation, mental foginess and occasional diarrhea.

## ProDefense

*ProDefense* is a general immune support formula that contains quercetin and curcumin which may support the body's immune system when going through a herxheimer clearing process.

## PathoGuard

*PathoGuard's* targeted formula supports the body's immune system in clearing bacteria, worms, and

parasites. It supports the immune system and healthy gastrointestinal function.

## Liposomal Resveratrol Curcumin

These two potent antioxidants have poor bioavailability unless given in a liposomal form. Research suggests that this combination may help balance Th1/Th2 function.

## Replenish Mitochondrial Health Kit

This comprehensive protocol combines lifestyle changes with homeopathic support for managing symptoms of low energy. Bioavailable supplements are included to support the immune system and mitochondrial health.

Each kit includes: *Liposomal Restore*, *Liposomal Catalyst*, *Liposomal Magnesium*, *Bio Cytotox Phase*, *Bio Co-Enzyme Phase*, and a practitioner guide.

# SERIES PROGRAM: Frequently Asked Questions

## Can my patient take more than one SSR Kit at a time?

For some patients, **taking multiple SSR Kits at once may be necessary**. If this is the case, try to narrow it down to three kits maximum.

For example (see sample calendar below), if you wished to prescribe **BOBA:SSR Kit**, **BART:SSR Kit** and **EPST:SSR Kit**, your patient would take **BOBA:SSR Kit** vial 1, day 1, **BART:SSR Kit** vial 1 day 2, **EPST:SSR Kit** vial 1 day 3, and back to **BOBA:SSR Kit** vial 2 on day 4.

## What if my patient forgets a vial?

If your patient has only missed a day, we recommend that they take it and move forward as scheduled.
